

Crunchy battered Alaska pollock fillets

by Mowi

Pure Alaska pollock fillets in a tempura coating. These natural, boneless Alaska pollock fillets come from MSC certified sustainable fisheries in the Pacific Ocean.

The extra crispiness guarantees 'double delight': the crunch of the coating and the delicious juiciness of the natural fillet. Quick and easy to prepare, it makes an excellent meal centre or – combined with fries – a delicious 'fish & chips' meal. An attractive way to serve fish which will go down very well with all the family.
