

Alaska pollock with grill marks by Mowi

Boneless, juicy Alaska pollock fillets from MSC certified sustainable fisheries in the Pacific Ocean, are the basis for these portions – available in two different weights – with grill marks. Alaska pollock belongs to the cod family and has beautiful white flesh with a flaky texture and a delicate flavour. The grill stripes add to the visual attractiveness and give the products a nice grilled appearance. Quick and easy to prepare in the oven, pan or airfryer. A convenient and delicious meal centre.
